

Indian Institute of Technology - Knowledge Sharing in Publishing - Call for Submissions 2022

The *Indian Institute of Technology Knowledge Sharing in Publishing* (IIT KSHIP, <https://iitikship.iiti.ac.in/>) is an Open Access publisher of peer reviewed open access books, journals and other forms of academic publishing. We are part of Ubiquity Press's (<http://www.ubiquitypress.com/>) partner network of university open access publishing.

The mission of KSHIP is two fold:

1. To solicit and publish original research monographs in Humanities, Social Sciences, Sciences and Engineering, and
2. To host peer reviewed journals from academic societies primarily in India.

KSHIP maintains rigorous international peer review standards with an Advisory and Review Board that meets the highest standards of academic research. KSHIP primarily publishes academic and scholarly journals and monographs in English; however, one of the strategic goals of KSHIP is to initiate and sustain a multilingual scholarly publishing platform.

To attain that goal we have a two-pronged strategy:

1. To solicit translations of research publications and
2. To solicit and publish original monographs in Indian languages. As IIT Indore is based in Madhya Pradesh, we will begin with Hindi but will add other languages, as we expand and add experts from different languages on our team.

For more details, visit our website <https://iitikship.iiti.ac.in/> .

Books (edited volumes and monographs)

KSHIP considers edited book/monograph proposals in areas of Humanities and Social Sciences across various disciplines with special focus on the following research areas:

- Digital Humanities
- Artificial Intelligence
- Algorithm studies (especially the humanistic aspects of it)
- Globalization and Urban Studies
- Gender studies
- Dalit scholarship
- Translation Studies
- Postcolonial Studies
- Environmental Humanities and other allied areas.

We accept manuscripts in English, however, KSHIP is committed to being a multilingual scholarly publishing press and therefore welcomes translations

and original scholarship in languages other than English. Currently, we consider manuscripts in Hindi (and will add other Indian languages soon).

We are particularly interested in translations of scholarly works in the fields of Science and Engineering and would welcome proposals in the area.

Journals

KSHIP will also host peer reviewed academic journals (that will involve a nominal cost of hosting and publishing costs). All of our publications will be peer reviewed by an international team of experts. The decisions of the editorial board with regard to manuscript acceptance will be final and binding.

Proposals

If you would like KSHIP to consider your proposal for a book or journal please download our proposal submission form from our website and send it to **kship@iiti.ac.in**.

Alternatively, visit our website <https://iitikship.iiti.ac.in/> and use the "Publish with us" button at the top right to be redirected to our Book Management System. Register as author and submit your proposal online.

Proposals are reviewed by the editorial team at KSHIP to ensure that they fulfil the requirements, interests and mandate of the publishing team.

Proposals that meet the criteria of scholarly publishing of the KSHIP editorial team will then be sent to at least two external expert reviewers for feedback and comment. The proposals will be reviewed for originality of content, innovativeness, relevance to the field (to be determined by external experts) and the intended target audience.
